### The new face of business summits

Turkish manufacturer of equipment for the construction industry Erisim Makina is not a newcomer to the Russian market however, with Julide Cesur appointment on the top position, who headed the Sales Department, the company has embarked on a very ambitious goals in the Russian market. This is the topic of that article (p. 10).

### MATERIALS

#### Gyproc: checked, confirmed, securely

Paper analyzes consumer and competitive properties of gypsum partitions manufactured by the Gyproc company. They allow increase significantly the usable area of the premises, to reduce the load on the floors and foundations, to provide the best acoustics (p. 13).

#### The Katerpal Oy plant manufacturing roofing shingles celebrates its 65 years jubilee!

The history of the famous Katerpal Oy factory deals with the production of shingles started in 1949. For years of work plant became a leader among manufacturers of bitumen products and roofing materials as in the Scandinavia and in many other European countries (p. 16).

#### Polymer membrane PLASTFOIL® is a waterproofing material of new generation

For many years bituminous materials used as waterproofing for roofs have been very popular, although they have a number of disadvantages: the fragility because of significant minus temperatures, a high degree of heat under direct sunlight (due to the traditionally dark color bitumen waterproofing), low speed of packing material, the need to use an open flame during installation, short term maintenance-free operation and so on, that is why in recent years worldwide, the share of polymeric membranes is steadily reduced in favor of polymeric membranes. That's the topic of the article (p. 19).

#### Alexey Didevich. Spider-B® from Ruukki: prefabricated buildings for general use

Russian subsidiary of the Finnish company Ruukki invited industry media to visit company's steel plant in Balabanovo city, Kaluga region, 18th of November. The event was dedicated to the launch of new product – improved model of prefabricated buildings Spider-B® produced from galvanized cold-formed profiles (p. 22).

#### Pyrinov B.V. The construction of first road bridge with the use of polymer composite material in Russia

This paper contains information about the construction of Russia's first road bridge, the main farm which is assembled from composite parts. The new design of the superstructure, the features of its calculation and technology of building-assembly works are described. Brief information about the results of the test bridge is considered as well (p. 24).

### EQUIPMENT

#### Bosch: features of the wall-mounted boilers use in Russia

This paper tells that gas wall boilers are one of the fastest growing segments among heaters, gas-fired,
